

The Federal Communications Commission

Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

An being on a set income (SSI) my funds are exhausted already just for living expenses. I also do not feel that the poor should keep paying and keep getting poorer. An the rich keep getting richer. I think it is past time for the rich to start paying their more than fair share of the taxes and different rate hikes. It is past time for you to start standing up for the poor and start making the rich pay their rightful dues.

PLEASE LET US THE LITTLE PERSON VOICES BECOME HEARD MORE, AND YOU START STANDING UP FOR US THE LITTLE PERSONS.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair!

Sincerely,

Mendy Harmon
